Immerse yourself in the world of robotics while you program, build, and automate a collaborative robot (cobot). In this Michigan Tech faculty-led course, you'll get a taste of careers in engineering and computing while building critical team skills used by industry professionals. This week-long, commuter-only day program for grades 9-12 brings the best of Michigan Tech to the St. Paul area and lets you learn and interact with a cobot!

Registration for the program is $650 and seats are filling fast!

Learn to interact with a cobot!
